- Spanish Camp
- Parent Corp Program
- Positive Behavior Support
- Book Nook
- WMU School of Psychology Anger Management Courses

## Parent Involvement

Parent-Teacher Conference Attendance Rates				
School	Fall 2008		Spring 2009	
	#	%	#	%
Lincoln	425	85	421	86

## Parent Involvement Policy

### **District Policy**

*The District will consistently work, in a variety of ways, to strengthen meaningful family participation in the education of their children.*

### **Lincoln International Studies Parent Involvement**

Parents are encouraged to participate in the Parents Association, the school improvement team and other school enrichment activities. Parent involvement is assessed through the yearly parent survey.

## Highly Qualified Staff

- 100% of the staff is teaching in their credential area of experience.
- No teachers with emergency or provision credentials are teaching in either the high or low poverty schools.
- No teachers are teaching in the classroom in either the high or low poverty schools that are not highly qualified.
- 2 Administrator with a Masters Degree
- 36 teachers; 21 with a Bachelors Degree; 12 with a Masters Degree; and 3 with a Masters+30
- All Title I instructional paraprofessionals are compliant with the NCLB requirements for highly qualified.

## School Improvement Plan

Reading	
Goal:	All subgroups will meet or exceed the state achievement targets in the area of English Language Arts: Reading.
Data to support goal selection:	All grade levels scored below district levels of achievement on the MEAP. Percentage gaps are as follows: 32% at 3 <sup>rd</sup> grade, 51% at 4 <sup>th</sup> grade, 17% at 5 <sup>th</sup> grade, and 6% at 6 <sup>th</sup> grade. African Americans averaged 17.5% and Hispanic students averaged 23% below the district average across all grade levels.
Planned Strategies and Interventions:	<ul style="list-style-type: none"> <li>• Implement a comprehensive, research based professional development program on active learning, formative assessment, guided reading, differentiated instruction and effective vocabulary instruction.</li> <li>• Implement research based Social Skills intervention groups for Tier 3 students</li> <li>• Continue Reach Out and Read (R.O.A.R.) Extended Learning Time and Extended Day Kindergarten for early reading intervention and extended learning time</li> <li>• Implement peer tutoring</li> <li>• Implement research based parent involvement program based upon the 6-types of parent involvement.</li> <li>• “Hooked on Books” Summer reading program</li> <li>• Continue CHAMPS - Positive Behavior Support implementation and Professional Development</li> <li>• Continue small group and individual interventions as noted in the intervention chart included in section F.</li> <li>• Continue Reading Recovery</li> </ul>
Accomplishments:	◇ Increased percentage of 6th grade students scoring proficient on the MEAP in the area of reading.
Implications for next year:	◇ Increase percentage of students in all subgroups at all grade levels scoring proficient on the MEAP in the area of Reading.
Writing	
Goal:	All subgroups will meet or exceed the state achievement targets in the area of English Language Arts: Writing.
Data to support goal selection:	Less than 20% of students in grades 3-5 and less than 60% of students in grade 6 scored proficient on the MEAP writing assessment.
Planned Strategies and Interventions:	<ul style="list-style-type: none"> <li>• Release time for implementation of comprehensive professional development plan.</li> <li>• Implement research based professional learning communities to promote collegiality and professionalism with a focus on student learning.</li> <li>• Provide additional support for struggling students through the use of volunteers assigned to the school “Publishing Center”.</li> <li>• Continue Building-Wide Positive Behavior Support to increase teachers’ use of behavioral management strategies that have strong research supporting their effectiveness.</li> </ul>
Accomplishments:	◇ Implementation of Professional Learning Communities providing time for review of essential writing skills and areas for targeted improvement.
Implications for next year:	◇ Increase percentage of students in all subgroups at all grade levels scoring proficient on the MEAP in the area of Writing.

## School Improvement Plan

Science	
Goal:	All subgroups will meet or exceed district levels of achievement in the area of Science as measured by the MEAP.
Data to support goal selection:	30% of students in the 5 <sup>th</sup> grade scored proficient on the MEAP Science assessment.
Planned Strategies and Interventions:	<ul style="list-style-type: none"> <li>• Identify “Power” GLCEs across grade levels to promote an in depth sustained study of a small number of topics rather than superficial coverage f many topics.</li> <li>• Identify key teaching strategies to be used across grade levels to promote mastery of essential skills.</li> </ul>
Accomplishments:	◇ Implementation of Professional Learning Communities providing time for review of essential content area skills and strategies for targeted improvement.
Implications for next year:	◇ Increase percentage of students in all subgroups scoring proficient on the MEAP in the area of Science.
Social Studies	
Goal:	All subgroups will meet or exceed district levels of achievement in the area of Social Studies as measured by the MEAP.
Data to support goal selection:	Less than 30% of students in the 6 <sup>th</sup> grade scored proficient on the MEAP Social Studies assessment.
Planned Strategies and Interventions:	<ul style="list-style-type: none"> <li>• Identify “Power” GLCEs across grade levels to promote an in depth sustained study of a small number of topics rather than superficial coverage f many topics.</li> <li>• Identify key teaching strategies to be used across grade levels to promote mastery of essential skills.</li> </ul>
Accomplishments:	◇ Implementation of Professional Learning Communities providing time for review of essential content area skills and strategies for targeted improvement.
Implications for next year:	◇ Increase percentage of students in all subgroups scoring proficient on the MEAP in the area of Science.
Math	
Goal:	All subgroups will meet or exceed the state achievement targets in the area of Mathematics.
Data to support goal selection:	Students in grades 3-5 decreased in proficiency and no grade level met the state set target for adequate yearly progress.
Planned Strategies and Interventions:	<ul style="list-style-type: none"> <li>• Implement a comprehensive, research based professional development program on writing across content areas and effective small group instruction.</li> <li>• Develop and implement academic incentive programs to motivate struggling students.</li> <li>• Implement small group and individual tutoring</li> <li>• Develop Common Assessments to monitor student progress and provide feedback to students on a more frequent basis.</li> </ul>
Accomplishments:	◇ Implementation of Professional Learning Communities providing time for review of essential content area skills and strategies for targeted improvement.
Implications for next year:	◇ Increase percentage of students in all subgroups at all grade levels scoring proficient on the MEAP in the area of Math.

## School Assessment Data

### Local and Norm Referenced Achievement Data

At \_\_\_\_\_ Elementary School we administer a variety of assessments to help determine student needs and progress. Students in grades 1 through 4 take the Iowa Test of Basic Skills to determine how students are progressing compared to a national peer group. Students in grades 3-9 also take Performance Series. Performance Series is a computer based assessment that gives teachers instant feedback on how well students are performing compared to their national peers and on the Michigan GLCE's.

### Nationally Normed Achievement Tests – Iowa Test of Basic Skills (ITBS)

# Core Curriculum

The purpose of the Kalamazoo Public Schools curriculum is to ensure that all students learn the same essential content based on the Michigan Department of Education (MDE) standards and expectations. The curriculum ensures that students will be able to access, evaluate, and use information in a technology-dependent world. The curriculum provides optimal learning opportunities for all students and is designed to ensure post-secondary success in institutions of higher education and the workplace.

## **The Process of Curriculum Development and Alignment**

As of 2007-2008, curriculum leaders, in conjunction with teachers, have integrated three major approaches to curriculum work in the development model. This model recognizes that creating curriculum guides alone does not enhance student achievement; it is merely the first step. Curriculum work must funnel down to classroom instruction, assessment, and instructional improvement based on data in order to maximize student achievement. As such, the model is focused on the work of Ainsworth, Marzano, Wiggins, and Tomlinson specifically as related to using standards for curriculum development, unit design, lesson design, instruction, differentiated instruction, and assessment (formative and summative). Our current process is indicated below:

- Unpack and prioritize Michigan Department of Education's grade level content standards (i.e., GLCEs and HSCEs).
- Unpack expectations using Ainsworth model of identifying verbs, nouns, concepts, skills, big ideas, essential questions, identify level of Bloom's Taxonomy for each expectation, create assessment items aligned to each prioritized standard
- Prioritize expectations
- Group expectations to create measurement topics
- Create end of course assessments
- Create assessment map
- Chunk
- Create course map and common formative assessments\*
- Train team in data analysis
- Create units of instruction using the Understanding by Design (UbD) model
- Implement, assess, reflect, modify for improvement

\*Common formative assessments are defined as periodic or interim assessments, collaboratively designed by grade-level or course teams of teachers and administered to all students in a grade level or course several times during the quarter, semester, trimester, or entire school year (Ainsworth, 2006).

The process of revising curriculum guides in the district involves teachers and curriculum leaders collaboratively conducting gap analyses using the following approach, in part, outlined by MDE:

- Standards and expectations published by MDE are identified and prioritized.
- Teams review existing documents to 1) determine whether GLCEs or HSCEs are taught in the curriculum and 2) identify the level of proficiency outcomes should be met.
- Pacing guides are reviewed to determine alignment along with corresponding resources.

Guides requiring revisions adhere to the cycle noted under *Process for Curriculum Development*.

All curriculum guides in the district are based on state standards and expectations. Serving as *living documents*, curriculum guides are reviewed annually to ensure alignment to state expectations and to incorporate needed revisions based on student data, research on best practices, and feedback from all stakeholders. In an effort to increase student achievement and effectively implement the curriculum, teachers across content areas engage in ongoing professional development. The sessions are designed to assist teachers in developing their capacity to a) further study and develop strategies to implement the GLCEs and HSCEs, b) use data to drive instruction, and c) identify areas of interest to strengthen classroom instruction. The district offers a variety of professional growth opportunities: differentiated professional development that allows teachers to develop in areas of interest; grade level/department sessions; school and district-wide sessions based on curriculum, data, and school improvement plans; training for group facilitators and content leaders representing their respective buildings; and voluntary after school sessions to further support instruction.

Several data warehousing systems are accessed to plan and evaluate professional development (building and district level), evaluate the impact of curriculum and instruction on student achievement, and support the development of school improvement plans. At the building level, staff members further align classroom instruction based on results from item analyses, disaggregated data based on subgroups, and noted trends over a period of time. At the district level, both aggregate and disaggregated data are used to establish academic goals, identify programming needs, and plan meaningful and relevant professional development.

## **The Foundation of Core Courses**

All core courses (English Language Arts, mathematics, science, and social studies) are based on GLCEs or HSCEs. Students have access to courses across levels with opportunities for differentiated instruction. Resources are aligned to curriculum guides based on state expectations and offer activities to meet diverse learning styles and needs. Classes plan for small and whole group differentiated instruction to ensure that all students have equal and equitable access to appropriate core outcomes. Student data (formative and context-bound) is also used to guide decision making and select appropriate resources. Special education teachers receive core curriculum guides and participate in training to interpret expectations for areas under study. Special education teachers also have the opportunity to work with building teams in identifying best practices for reaching struggling learners. Professional development opportunities with corresponding resources are offered to all teachers in the district

### **Teaching to Expectations (Units of Study)**

Curriculum documents are designed to teach the Michigan Grade Level Content Expectations (GLCEs) to all students. The units of study are divided into three stages based on the genres to be explicitly taught at each grade level. **Stage 1** of each unit identifies the desired results for all students in a specific grade level. Stage 1 specifies what each student should know, understand, and be able to do at the end of the unit. The “desired results” designates the content worthy of understanding, what enduring understandings are desired, and what essential questions will be explored. Stage 1 calls for clarity about the priorities of the unit. **Stage 2** of each unit determines the acceptable evidence from the desired understandings and content of the unit of study. Stage 2 provides diagnostic, formative, and summative assessment to allow educators to know when students have achieved the desired results of the unit. This stage describes the acceptable evidence of a student’s understanding and proficiency. The assessment evidence reflects the desired results of Stage 1. **Stage 3** of each unit is the instructional plan. Stage 3 suggests the activities, sequence, and resources which are best suited to accomplish the goals established in Stage 1. This stage focuses on the knowledge and skills students need to perform effectively to achieve the desired results. The goal is to make teaching engaging and effective for learners, while always keeping the end in mind.

### **English Language Arts**

The kindergarten through third grade curriculum writing teams drafted reading guides winter 2009. All elementary teachers received draft guides and professional development fall 2009 and 2010. Full implementation of guides in classrooms is scheduled fall 2010.

In the area of writing at the elementary level, teams will assemble during the 2009-2010 school year to review resources. The outcome of the review will drive development of K-5 writing curriculum guides during 2010-2011 with full implementation and professional development in 2011-2012. Serving as living documents, writing teams will review guides yearly to a) incorporate diagnostic assessments, b) adjust expectations for learning experiences based on data, c) include scaffolding and reference materials, and d) strengthen units of study. At the secondary level, teams assembled fall 2009 to review resources and write guides for targeted courses. English curriculum guides drafted in 2007-2008 were scheduled for full implementation during 2009-2010 or 2010-2011. Professional development activities occurred fall 2009 and will in fall 2010. Plans to conduct resources audits for specific elective English courses will occur during 2011-2012 with possible adoption recommendations and curriculum development work in 2012-2013.

### **Math**

A representative group of elementary teachers assembled in fall 2008 to explore options for new resources aligned with state expectations and based on best practices for grades K-5. Following the scheduled resource pilot in January 2009, mathematics leadership team members will identify and recommended a new series in March 2009. Professional development activities were scheduled for late summer and fall 2009 that provided assistance to classroom teachers with using guides and new textbook series to teach grade-level content expectations. During 2008-2010, the curriculum writing team, along with classroom teachers, convened periodically to report on the quality of guides and offered recommendations for improvement. The implementation began in fall 2009 and will be provided with ongoing opportunities for improving guide components and professional development.

With respect to middle school mathematics, the leadership team will review resources during 2009-2010 to investigate quality, relevance in meeting state expectations, and unification of format and content with the K-5 program. Based on findings, the adoption and curriculum development process may occur in 2010-2011 with scheduled professional development in fall 2011. In the meantime, to focus instruction on grade-level content expectations and support instructional practices, mathematics writing teams will assemble in winter 2009 to strengthen currently used guides. In winter 2009, high school curriculum writing teams collaborated with teachers to complete guides drafted during 2007-2008. In fall 2009, teachers received drafts guides and are expected to fully implement the program during 2009-2010. Plans to conduct resource audits for specific elective courses will occur 2010-2011. Revisions in state course expectations will direct future curriculum writing efforts during 2010-2011 and 2011-2012

### **Science**

During the 2007-2008, the district adopted a K-6 science program developed by Battle Creek Area Mathematics and Science Center (BCAMSC) in Battle Creek, Michigan. BCAMSC curriculum guides contain instructional units aligned with grade level content expectations for life, earth, and physical science strands. On a yearly basis, BCAMSC provides teachers with updated unit activities and curriculum guides (components), includes resources to address realignment needs indicated by MDE, and offers professional development. Over the past two years, the district has phased in units by specific grade levels. In accordance with the final phase of implementation plan, 3rd through 6th grade teacher received the newly realigned science units with curriculum guides and training in fall 2009. consistent with the elementary direction and based on the results of an resource audit conducted in 2007, the science leadership teams will consider piloting BCAMSC units along with other resource options for 7th and 8th grades in spring 2010. Upon approval, the leadership team will deliver professional development sessions during 2010-2011. In the meantime, the 7th grade curriculum writing team assembled in winter 2009 to draft pacing guides and identify supplementary materials for use in fall 2009. Similarly, the 8th grade curriculum writing team assembled in winter 2009 to continue writing pacing guides previously drafted in 2007-2008. Seventh and eighth grade teachers received draft pacing guides in fall 2009 with supporting professional development. Full implementation of the 7th and 8th grade science curriculum guides will occur 2010-2011.

In 2010-2011, curriculum writing teams will implement secondary science guides drafted during 2008-2009. Curriculum teams worked during the summer in writing these guides to provide teachers with drafts and professional development in the fall 2009. Teachers will fully implement revised guides in 2011 with opportunities for improving guide components and professional development. Curriculum writing teams will assemble during 2009-2010 and 2010-2011 to investigate alignment between high school content expectations and currently used textbooks in honors and elective courses. Based on findings, recommendations for adoptions and the subsequent revision of curriculum guides will occur in winter 2010 with professional development during 2010-2011.

## **Social Studies**

To address MDE revisions at the elementary level curriculum writing teams conducted K-5 resource audits to ensure alignment to the grade level content expectations. Teachers will receive draft guides in fall 2010 with supporting professional development. Full implementation of guides is expected fall 2011. At the middle school level, 6th grade recently underwent a textbook adoption and as a result, curriculum writing teams assembled draft curriculum guides that provide direction in implementing the newly adopted series in the fall of 2009. Teachers engaged in professional development in fall 2009 and will continue the work during the year. Full implementation of the revised guide is scheduled fall 2010.

During 2009-10, the middle school social studies curriculum writing team will review grade level content expectations and resources to determine cohesiveness of the 6th and 7th grade courses. Recommendations to shift or redistribute partial content in 7th grade to 6th may occur based on breadth of current MDE social studies topics. This decision will assist with ensuring vertical articulation between courses. Based on resource needs, the curriculum writing team may recommend an adoption during 2009-2010. The 7th grade curriculum writing team will continue drafting curriculum pacing guides during 2009-2010 with full implementation in 2011. In 8th grade, a textbook adoption committee convened in 2007-2008 to conduct a resource audit and pilot selected resources. As a result of the pilot, committee members recommended a new textbook series for adoption in winter 2010. In the meantime, the curriculum writing team will complete 8th grade previously drafted in 2008-2009. Teachers received draft guides in fall 2009 with scheduled professional development. Full implementation of the 8th grade guides with new resources is scheduled 2011.

High school social studies curriculum guides drafted in 2007-2008 are scheduled for full implementation in 2010-2011. To meet timelines, curriculum teams have assembled this year to continue writing guides. Several of these guides will undergo major revisions due to new MDE high school content expectations. Teachers received draft guides in fall 2009 along with professional development. With respect to elective courses, curriculum writing teams will conduct resource audits during 2010-2011 and 2011-2012. Curriculum writing teams may offer recommendations for adoptions based on findings. Writing teams will complete related work with developing curriculum guides between 2011-2012 and 2012-2013.

## **Variations**

All schools use Kalamazoo Public School's curriculum guides that are aligned to MDE expectations and standards. Magnet schools and schools with special themes integrate their specialized areas into the KPS curriculum.
